# Bronco

Bronco is made from buffalo skin, which is known for its thickness and strength. After the first tanning process the skin is treated with vegetable extracts to give it its natural look. After this, the skin is washed and hand-waxed, which gives it a two-toning effect. To give it a vintage look the skin is washed again and polished after drying. The result of all this is that every bag has its own character with differences in shading and look. And because the skin is not sealed, the waxes can migrate over time, making your bag truly uniquely yours.

# AUTHENTIC

Authentic leather is made from buffalo skin has been retanned with vegetable extracts. The rugged vintage character is achieved by treating the skins with waxes and oils. Like the Bronco leather the waxes can migrate over time, ensuring that each product made from this leather has its own authentic look.
